About Us

We are a medium sized investment company Egycom "Egyptian company for technological industries". We are located in 15 May city, 1st industrial zone, Egypt and a Production Headquarter in the second industrial zone.

We are dedicated in metal machining and metal forming. We supply reputable companies with annual production lines in machined parts and sheet metal components.

We are supplying companies in fields such car making, Air conditioning, furnaces, cookers, and most of durable products.

We are Serving industry through machined products and also tools for others' manufacturing. We are interested in tooling selection and new tooling technologies, as we utilize in our facility. We have an excellent knowledge in tool selection in MCT "Metal Cutting Training" Academy.

We are obsessed in taking this product to the customer in a professional way. Through courses and academic studies we can approached that.

Our Production In The Areas of:

Vehicles & Trucks

Air Conditions

Metal Forming

Home Appliances

Springs

CNC-TAKANG

CNC-TAKANG is one of the leading machine tools manufacturers in Taiwan. We have been in business since 1973. The company is efficiently organized with top engineers with more than 20 years of manufacturing experience. All of our machines are well inspected before delivery.

- Our goal is to provide the most stable quality products and quick services for customers.

CNC-TAKANG main products:

- Heavy Duty CNC Lathes (Slant & Flat bed)
- Precision CNC Lathes (Double Spindle/Double Turret, Swiss Type)
- Conventional Lathes
- Machining Centers (Vertical, Horizontal, Double Column, High Speed & 5 axes)
- Vertical CNC Lathes.

ARIX CNC MACHINES established on 1995.

We are manufacturer for CNC milling machine and CNC lathe machine.

In the first 10 years, we focus on mold-making customers.

Our V series milling machine has good performance on accuracy.

And in near 5 years, we also focus on dental machine which has new brand name ARDENTA.

We have sold machine to Germany, France, Italy, Greece, Thailand, China, India, Australia, Malaysia, USA, Turkey, Pakistan, Singapore, Norway, Russia, South Africa, etc... more than 20 countries.

Especially in Germany and France, we have cooperate with the dealers for more than 10 years.

We have ever done custom-made about FANUC or Mitsubishi, Siemens and Heidenhain controller.

Not included dental machine, we sold about 130 set of machine every year.

Among 60%~65% of them are sold to overseas markets.

In the past year, we sold about 80 sets of dental machine, mostly in Taiwan.

Next year, we'll more focus on promoting our dental machine to global market.

WTO is a medium size and family owned enterprise, led in second generation and with the headquarter located in Ohlsbach, Germany.

We are specialized in the design and manufacturing of high precision static and driven toolholders.

According to our slogan "Quality without making compromises" our strategy is to constantly build on excellence in technology and quality to serve our market and our customers.

All our products are made "Made in Germany".

About

We are specialized in the design and manufacture of high precision static and driven toolholders for Turning Centers, Multiple Spindle Turning Centers and Swiss Type Turning Centers.

Our products are used worldwide in the metal cutting industry where high precision parts are manufactured with efficiency. Our customers are found in the whole industry such as endusers, distributors or OEM's.

Our strategy is to constantly build on excellence in technology and quality to serve our market and our customers. To guarantee the highest quality standard, we manufacture our products exclusively in Ohlsbach, Germany.

Our employees are our best assets. Because of our strong commitment to quality we employ people with high qualification. Therefore WTO invests continuously in the qualification process of new and existing employees according to the latest technology level.

In our own apprenticeship program we train young workers and integrate them step by step into the working environment.

Higher Productivity Pays

Static and Driven Precision Toolholders for Turning Centers

Performance Series®

Precision driven toolholders from WTO for high cutting performance and long tool life.

Kyocera started 1975 with the production of cutting tools - today we are one of the leading manufacturers of cutting tools in the world.

- Our wide range contains various products of innovative technology for turning, drilling, milling, grooving, threading and cut-off based on diversity of cutting materials like carbide, cermet, ceramic, CBN and PCD.

- Especially our Advanced materials like mixed ceramic, silicon nitride ceramic, CBN and cermet are rated highly. In manufacturing Kyocera uses modern precision technology.

- Our tools are designed to the individual need and find employment in generally mechanical engineering, the automotive manufacture and their supplier (here e.g. brake disks, antifriction bearing etc...) as well as in tool and mold making. Constant advancements (Cell Fiber) ensure for the fact that Kyocera tools have foresighted answers to existing and future needs of metal working industry.

ARNO®

WERKZEUGE

We have a passion for precision.

ARNO-Werkzeuge combines German traditions with state-of-the-art cutting technologies worldwide. We achieve outstanding results through continuous research, development and innovation of ARNO tools. Testing and exploring new materials allows us to introduce new high-performance products year after year, that withstand the wear and tear of high-speed and high-feed machining. Our modular systems assure enhanced flexibility for your projects.

Customer feedback and team work throughout all departments is the key to leverage our know-how and to fulfill special solutions with the opportunity to include them into our standard program later on.

Our popular and economical drilling systems SHARK-Drill and SHARK-Cut, as well as the AKB short hole drill and our large variety of indexable inserts represent our experience and competence in the field of precision tooling. Additional products for milling or parting and grooving make our product range complete.

ARNO-Werkzeuge is well-known for its reliability and high-performance worldwide.

RESISTOR OPAL

For over 40 years, we have left it to our customers to talk about us,

while we focused on improving our product, quality and service we left it to our customers to promote us for over 45 years

We stand for Innovative diamond and CBN tools.

"Made in Switzerland" is not just a slogan for us. We commit ourselves to precision and product quality at the highest technical level for more than 40 years.

By combination of technical know-how and most modern machinery , the WEISS company is your ideal partner.

One of our greatest strength is the production of diamond and CBN tools in the areas of:

- Turning
- Milling
- Dressing
- Grinding

As one of only few manufacturers of diamond tools, we manufacture tools with both natural and synthetics diamond.

Our motivation is your additional benefit.
